

ZULFIQAR ALI MIR

Quantitative Researcher · AI Engineer · Chartered Management Accountant

manager.equity.finance@gmail.com | +92 322 5150501 | linkedin.com/in/zulfiqar-ali-mir | github.com/zulfiqaralimir | Islamabad, Pakistan

PROFILE

Quantitative researcher and AI engineer with a PhD in Econometrics and a Chartered Management Accountant (CMA) qualification, combining econometric research, portfolio analytics, and production-grade AI systems. Built an autonomous agent that monitors SEC filings from Gulf sovereign wealth funds — including QIA, ADIA, PIF, and Mubadala — for portfolio-shift and activist-position signals. Currently supports frontier AI evaluation for Anthropic, Apple, and Meta as an LLM Trainer at Turing, and leads applied fintech/AI product development at Black Iron Quantum AI.

CORE COMPETENCIES

Quantitative & Financial: Portfolio Optimization, Equity & Fixed-Income Research, Risk Modeling, Financial Forecasting, Time-Series & Causal Econometrics, Management Accounting & Cost Control

AI / ML Engineering: LLM Fine-Tuning (RLHF/SFT), Agentic AI Systems (LangGraph, CrewAI, Google ADK), NLP, Deep Learning (PyTorch), Applied Generative AI

Programming & Data: Python (Advanced), R, SQL, TypeScript, MATLAB, STATA, EViews; FastAPI, Next.js, PostgreSQL, MongoDB, pgvector

Cloud & Platforms: Azure, AWS, Google Cloud (ADK, Cloud Run), GitHub Actions, Power BI, Tableau

FEATURED PROJECT — SOVEREIGN WEALTH FUND FILING INTELLIGENCE

Gulf SWF SEC Filings Agent — AI-Powered Regulatory & Portfolio Intelligence System *Personal / Black Iron Quantum AI | 2026*

- Built a full-stack AI agent that autonomously tracks and analyzes SEC filings from Gulf sovereign wealth funds — ADIA, PIF, QIA, and Mubadala — monitoring 13F, 13D/G, and SC filings across a \$4T+ AUM universe for portfolio shifts and activist positions.
- Engineered the agentic reasoning layer using Gemini 2.5 Flash and Google Cloud Agent Development Kit (ADK), enabling natural-language querying of filing data with reasoning-backed responses.
- Designed a FastAPI backend with MongoDB Atlas for structured storage of parsed SEC EDGAR filings; deployed a Next.js frontend on Vercel and backend on Google Cloud Run.
- Companion system (Web Data UNLOCKED Hackathon, 2026) generated institutional-grade BEARISH/BULLISH/NEUTRAL investment signals on 87+ live filings using Gemini 2.0 Flash and Bright Data's residential proxy network to bypass EDGAR rate limits.

Stack: Gemini, Google Cloud ADK, FastAPI, Next.js, MongoDB Atlas, Cloud Run, Python, SEC EDGAR

PROFESSIONAL EXPERIENCE

Director, Accounting ERP SaaS Platform — Black Iron Quantum AI (Private) Limited *Islamabad, PK | 2026 – Present*

- Lead design and development of a cloud-based Accounting ERP SaaS platform for SMBs covering General Ledger, AR/AP, Cash Management, Budgeting, and Financial Reporting.
- Design financial dashboards and BI reporting for CFOs and controllers; integrate AI-powered forecasting and FP&A advisory capabilities.

Research Analyst / LLM Trainer — Advanced Mathematics — Turing (Palo Alto, California) *Remote | Sept 2024 – Present*

- Perform RLHF and Supervised Fine-Tuning (SFT) to refine frontier AI models in advanced mathematics; clients include Apple, Meta, and Anthropic.
- Assess AI-generated solutions for mathematical rigor, deliver structured feedback, and shape model reasoning behavior.
- Serve as Subject Matter Expert (Mathematics) on Turing's Paper Assist STEM Project, evaluating AI outputs for accuracy, logic, and instruction adherence.

Senior Research Analyst & Financial Strategist — Mir Global Soft Private Limited *Islamabad, PK | 2020 – Present*

- Conduct equity research and quant-driven investment strategy development; build financial models and portfolio optimization frameworks.
- Created a Stock Market Index for the Technology Sector; produced market analysis leveraging 15+ years of capital markets expertise.

Equity Investment and Portfolio Management — Pakistan Stock Exchange

Islamabad, PK | 1999 – 2004

EDUCATION & PROFESSIONAL QUALIFICATIONS

Master's in Financial Engineering (MScFE), WorldQuant University (USA) — In Progress • Jan 2025 – Present

Ph.D., Econometrics, Pakistan Institute of Development Economics (PIDE) — CGPA 3.36 • Aug 2016 – Aug 2022

Thesis: Causal Discovery using Modified RizPC Algorithm from Observational and Latent Variable Data

M.Phil., Economics and Finance, PIDE — CGPA 3.21 • Aug 2014 – Aug 2016

Thesis: The Impact of Macroeconomic Volatility on Stock Returns Volatility: Evidence from the Pakistani Stock Market

MBA, Human Resource Management, Allama Iqbal Open University • Aug 2006 – Sept 2009

B.Sc., Mathematics & Statistics, F.G. Degree College, Wah Cantt • June 1990 – June 1992

HONORS & DISTINCTIONS

- National Winner – AI FinTech Projects (2025), National Technology Fund (MoITT) & Asian Development Bank (ADB)
- McKinsey Forward Program Participant, McKinsey & Company (Dec 2024)
- Section Leader – Python Programming, Stanford University (May–June 2025)
- HEC AI Judge, Generative AI Instructor/Mentor/Judge — NCEAC–HEC Cohort 2 (2026)

SELECTED CERTIFICATIONS

- Chartered Management Accountant (CMA), Institute of Cost and Management Accountants of Pakistan (ICMAP) • 2006 – 2010
- Neo4j Fundamentals — Graph Academy
- Multi AI Agent Systems with CrewAI — DeepLearning.AI
- Generative AI for Everyone — DeepLearning.AI
- Construct Stock Market Indices — Coursera
- Introduction to Fundamental Analysis & Stock Market Basics — Pakistan Stock Exchange
- Applied Research Methods for Economics & Finance — PIDE
- Introduction to CGE Modeling — PIDE
- Azure AI Fundamentals — Microsoft
- SQL and Relational Databases — IBM
